

The Times Jumbo Concise Crossword Game – brand NEW version!

These games are a marvellous mental workout against the clock! A solution pattern has been extracted from a 27 x 27 Times Jumbo Concise Crossword. The letters contained therein are arranged in a stack alphabetically alongside the grid. Each letter is accompanied by a number tag indicating the number of tiles available.

Play commences with the activation of the clock by clicking on anywhere in the solution pattern before you. Play can be paused at any time, but the entire game will be masked until Pause is reactivated. The relevant clue appears above the grid. Your task is to complete your puzzle in the fastest time possible, by selecting the letters you need from the alphabetical stack. Clicking on a letter notifies the program that you wish to place that letter. The letter count is reduced. Clicking again on the grid allows that letter to appear in your designated spot. If you believe you've made an error, touching the letter again blanks it out, and you can either return it to the stack or place it elsewhere on the grid. Meanwhile the time will continue to your disadvantage! Letters are revealed on the grid against a blue background.

Our aim is to improve your experience! I hope you like our new improved versions! Help mode highlights the correct solution. No Help mode only confirms or rejects the conclusion of the game at your submission.

Readers' suggestions welcome. email: davidakenhead8@gmail.com
